ÖZET

2024 yılının Aralık ayında Suriye'de Esad rejiminin çökmesi ve yeni rejimin oluşturulması uluslararası kamuoyu tarafından şaşkınlıkla karşılanmış ve dünya sistemi önemli derecede etkilemiştir. Suriye'deki bu olay Ortadoğu'nun yanı sıra Doğu Avrupa ve Karadeniz gibi diğer bölgelerdeki güç dengesi üzerinde büyük değişiklikleri yaratırken Suriye Devrimi üzerindeki analizler ağırlıklı olarak Ortadoğu bölgesine odaklanmakta ve olayın diğer bölgeler ile ilişkileri ise büyük oranla göz ardı edilmekte olup yeterince araştırılmamıştır. Bu durumu göz önünde bulundurarak bu çalışma Suriye Devrimi'ne yönelik Romanya'nın tutumu ve olayın Romanya'ya etkilerini ele alacaktır. Bu çalışmada şunlar ileri sürülecektir: Romanya Karadeniz güvenliği ve mülteci krizi bağlamında Suriye krizinde doğrudan bir taraf olmadan dengeli bir tutum benimsemiş, Esad rejiminin çöküşü karşısında Suriye halkının kendi geleceğini belirlemesi gerektiğini vurgulamış ve siyasi çözüm çağrılarını destekleyerek dikkatli bir politika yürütmüştür. Ayrıca Suriye Devrimi'nden sonra Esad rejiminin çöküşü Rusya'nın dünya siyaseti üzerindeki etkilerinin önemli derecede azalmasına yol açmış ve Romanya'daki Rus yanlısı aşırı sağ kanadının yükselmesinin engellenmesini etkilemiştir. Böylece Suriye Devrimi Karadeniz güvenliği açısından Rusya'nın varlığına karşı olan Romanya'daki Batı yanlılarını aşırı sağcılara karşı avantajlı hale getirmiştir. Bu çalışma konunun güncelliği sebebiyle ikincil kaynakların yanı sıra internet haber ajansları gibi kaynaklardan da faydalanacaktır. Elde edilen veriler hem ampirik kaynak olarak hem de içerik analizi için kullanılacak ve genel olarak nitel araştırma yöntemleri kullanılacaktır.

ABSTRACT

The collapse of the Assad regime in Syria in December 2024 and the establishment of a new regime astonished the international public and significantly affected the international system. While this incident in Syria created major changes in the balance of power in the Middle East as well as other regions such as Eastern Europe and the Black Sea, the studies on the Syrian Revolution mainly focus on the Middle East and the relations of the incident with other regions are frequently ignored and have not been sufficiently investigated. Taking this into account, this study will examine Romania's attitude towards the Syrian Revolution and the effects of the incident on Romania. The following will be put forward in this study: Romania adopted a balanced stance in the context of the security in Black Sea area and refugee crisis without directly interfering to the Syrian crisis. It emphasized that the Syrian people should determine their own future in the face of the collapse of the Assad regime and carried out a careful policy by supporting calls for a political solution. In addition, the collapse of the Assad regime after the Syrian Revolution led to a significant decrease of Russia's influence on world politics and influenced the prevention of the rise of the pro-Russian far-right wing in Romania. Thus, the Syrian Revolution strengthenned the pro-Western parts in Romania, who are against Russia's presence in terms of Black Sea security, against the far-right. Due to the topicality of the subject, this study will benefit from secondary sources as well as sources such as internet news agencies. The data obtained will be used both as an empirical source and for content analysis, and qualitative research methods will generally be used.
